Dear PEN-CP Magazine Readers

Hopefully everyone had a productive first month of the new decade!

After some 16 months of constructing the foundation for PEN-CP – including setting up the POP-platform, populating POP with lots of useful data, finishing first Expert report, kicking off work in multiple Annual study chapters, liaising with multiple key stakeholders, and more – it is time to move to the next stage, what is called now PEN-CP 2.0.

The most important action with PEN-CP 2.0 is setting up and operationalizing the three PEN-CP Expert Teams, the 3 PETs, which will play a focal role in identifying, prioritizing and detailing Customs security challenges and user needs across the project (see pages 3-5). The diagram on the cover of this magazine visualizes the key instruments and actions each PET will be feeding into, as of March 2020. All partners, please be active in joining at least one of the three PETs, by the end of February.

As everyone should be aware, the first reporting period, P1, closes by the end of project month 18, on 29.2.2020. Within 60 days from the closure of each reporting period, each partner has to prepare the resources consumed and the financial report (including “Form C”) to be submitted to EC. The coordinator can assist any partner with questions about the process; while the final submissions are performed by each partner directly to EC. Please email any questions to: pen-cp@cross-border.org. We will also organize the 6th Full Consortium Web-meeting during first half of March, focusing primarily on the P1 reporting formalities (date and time to be announced soon). In addition, you can always contact your H2020 National Contact Points to ask advice about the reporting formalities (see page 17).

Hope you enjoy reading the Magazine 7!

In Thun, 12.2.2020

Juha Hintsa

PS. Please pencil in preliminary dates for Year 2 Annual event: 6-8.10.2020, in Dublin (this will be confirmed soon)
Lifting the three PEN-CP Expert Teams into **FULL ACTION!**

**OVERVIEW**

**ON THE THREE PEN-CP EXPERT TEAMS (PETS)**

As discussed during the Year 1 Annual Event in Budapest, it is important now for PEN-CP to establish and operationalize the three Expert Teams (PETs), who will play a focal role in guiding the work scope for the remaining 3.5 years of the project. For now, the three PET groups are particularly important when it comes identifying priorities and driving follow-up activities with the Customs challenges and User needs/requirements, i.e. the “PUNIs”. The three PETs naturally match fully with the PEN-CP technical themes:

- **PET-1**: Data and risks
- **PET-2**: Detection technologies
- **PET-3**: Laboratory equipment

**ORGANIZATIONAL SET-UP AND SUPPORT**

Each PET is self-organized, with minimum 4 customs partners (and maximum 13 partners) per team.

Each PET is chaired by one customs expert, which would normally change (circulation between the PET experts) at the end of each year - details to be agreed later.

To support the meeting planning and notetaking, CBRA attaches one technical expert per PET, and UNIL attaches a research expert across all three PETs.

**TOOLS AND DATA SHARING**

1. **POP**: PEN-CP Online Platform (POP) has sections dedicated per each PET-team

   Webex platform can be used for all web-meetings
   
   Note: please avoid booking multiple PET-meetings at the exact same time, as then we need to subscribe to a 2nd Webex account).

2. **WEBEX**:

3. **EMAILS AND PHONE**: In addition, information on emails and phone numbers can be shared among the PET experts.

4. **OTHERS**: Each PET can also discuss if they would opt to use Whatsapp (or similar tool) for “quick communications”.

---

**-3-**
Next actions for each of the 13 PEN-CP Customs partners

1. Agree internally on which PET-team(s), minimum one team (and maximum three teams) your administration will engage with.

2. Send an email to the PET-1 / PET-2 / PET-3 teams (as listed above).

3. The team leader will then reply back to you, and inform the date and time for the kick-off web-meeting.
Specific activities AND EXPECTED (MINIMUM) OUTCOMES by 30 June 2020

- Each PET group is asked to hold two web-meetings by the end of June 2020
- Discuss (and take notes) on important Customs challenges and User needs/requirements (both in and out of the current PUNI database), while using the “Priority 1/2/3” grading with the important PUNIs (PET leaders will provide more details).
- Carry out matching exercise with the important PUNIs, and relevant solutions and projects (both in and out of the current PUNI database). Take notes on promising matches.
- Discuss and suggest follow-up actions, particularly in the context of PEN-CP Prototype grant calls and Open innovation calls (Challenge competitions & Hackathons & Crowdsourcing ideas).
- Brainstorm and agree on specific topics (PUNIs) which could be used for Year 2 Innovation Award(s): “Who comes up with the best Solution idea to a specific problem” (detailed to be defined).
- Discuss and suggest tangible topics for the future Horizon Europe program (follow-up for H2020)
- After June 2020, we will revisit the agenda and priorities for the three PET groups to continue the work, in the most beneficial way for the PEN-CP partners and broader customs community.

Proposed meeting plan for year 2020 (all meetings per PET-team)

- Kick-off web-meeting
- Web-meeting 2
- Live-meeting 1
- Web-meeting 3
- PEN-CP Magazine Issue 7 | LIFTING THE THREE PEN-CP EXPERT TEAMS INTO FULL ACTION!
Measuring PEN-CP impacts in innovation acceleration – Survey results from the 13 PEN-CP customs partners

**RESULTS**

**MOST VALUABLE PEN-CP SERVICES – TOP 6**

1. Match customs challenges with promising solution
2. Collect customs challenges
3. Make customs administrations aware of solution providers which they did not know previously
4. Keep track of promising innovations and developments in the market within the traditional customs domain.
5. Collect potential solutions for such challenges from customs officials, universities, firms (of various sizes, including SMEs, start-ups and scale-ups), etc.
6. Facilitate the sharing of user experiences of solutions, including technical test data sheets, among customs administrations.

2019

We applied a survey to all customs partners of PEN-CP. The main objective was to assess how well PEN-CP is able to serve and support the Customs partners in their innovation-related plans and efforts.

Based on the results, we will follow-up bilaterally with the customs partners as of March 2020 (via interviews or questionnaires). Examples of follow-up questions are presented in this article.

Two more surveys will be applied:
- At the end of 2020
- Near the end of the project.
OTHER REASONS WHY THE PEN-CP CUSTOMS PARTNERS DECIDED TO JOIN THE PEN-CP

- To reinforce communication and cooperation between customs
- To improve cooperation between partners: (i) Exchange of information and knowledge and best practices, and (ii) Education and training about customs security
- To keep track on technical developments
- To be on the leading edge of development of new technology
- Possibility to co-fund innovation to share the burden and move development forward
- Possibility to have joint procurements
- Opportunity to "grow" the customs market and to share innovative work

FOLLOW-UP QUESTIONS TO THOSE THAT HAVE SOMEONE IN CHARGE OR INNOVATION:
- What are the performed activities?
- Could there be any synergies with PEN-CP?
- What can PEN-CP do to boost their innovation activities?

FOLLOW-UP QUESTIONS TO THOSE THAT COLLECT CUSTOMS CHALLENGES:
- What type of challenges are being collected?
- How are these challenges being collected?
- Are these challenges shared somehow?
- How are these challenges addressed?
- Can PEN-CP gain access to these challenges?

8 CUSTOMS PARTNERS COLLECT CUSTOMS CHALLENGES

Challenges refer to problems your administration or customs officers are facing today or expecting to face in the future in both operational and/or managerial work.

7 CUSTOMS PARTNERS (OUT OF 13) HAVE A PERSON OR A DEPARTMENT THAT DEALS WITH THE TOPIC OF INNOVATION

7 PEN-CP Magazine Issue 7 | MEASURING PEN-CP IMPACTS SURVEY RESULTS
Follow-up questions to those that monitor emerging products and services:

• How the monitoring is done?
• How often the monitoring occurs?
• Main objective to monitor

4 customs partners have organized open innovation activities (hackathons and challenge competitions)

Follow-up questions to those customs administrations that have implemented open innovation activities:

• Provide details on the organization, participation, outcomes and lessons learned of each open innovation activity

7 customs partners have monitored emerging products and services

Follow-up questions to those customs administrations that have cooperated with firms:

• What type of cooperation do you engage with firms?
• Objective of the cooperation
• Provide past experiences on such cooperation. We are mostly interested on cooperation with firms related to help them in the process of ideation, design, testing, validation, evaluation of new products and services.

8 customs partners (out of 13) cooperate with firms

8 customs partners have a suggestion box

Follow-up questions to those customs administration with “suggestion boxes”:

• Are challenges and solutions collected through the “suggestion box”?
• Can PEN-CP use this tool to collect challenges, user needs and potential solution ideas?
The 1st PEN-CP Expert Report was completed in December 2019!

As shared in PEN-CP Magazine 5 (July 2019) interview article, the European Start-up Network, ESN, was selected to carry out the work for the 1st Expert Report in our project. The final outcomes on “Mapping start-up and scale-up landscape in Europe – and how to work further with the mapping outcomes” -study is now available on the POP-platform (Archive-section). In addition, the shortlist of 87 customs security relevant startup and scaleup companies is currently being entered in the PIO-section of the POP-platform.

**Phase 1**

Phase 1, namely scanning and identifying startups and scaleups in the relevant customs areas, provided insights within the startup and scaleup ecosystem related to customs operations and security innovations. ESN scanned its extensive database and identified high-potential startups and scaleups according to the jointly developed criteria. The longlist of 250 startups and scaleups was presented to customs experts, together with a mapping of startups and scaleups according to the themes and geographical spreading.

**Phase 2**

Phase 2, namely shortlisting, consisted of conducting a careful investigation about the business status, maturity stage, funding status and growth needs of startups and scaleups. ESN shortlisted 87 companies, out of which 55 are scaleups, in the customs thematic areas and assessed their readiness to cooperate in the context of the PEN-CP network. PEN-CP has also been provided with verified contact information of decision makers, across the 87 companies.

**Phase 3**

Phase 3 was about accessing startups and scaleups for innovation, communication and interaction purposes. In the final report, ESN devises a multi-channel communication and interaction approach to effectively engage startups and scaleups. The approach is funnel-based and is supported by social media communications.
GOOD PRACTICE RECOMMENDATIONS: ENGAGING WITH AND EXPANDING THE POOL OF STARTUPS AND SCALEUPS

- Treat startups as partners for a win-win relationship, not agencies or employees.
- Choose the collaboration model that is right for your institution and that best delivers on your objectives.
- Create a culture of entrepreneurship, encourage agents to interact with startups and scaleups. Build a mindset, a culture and a process to organize efforts.
- Careful consideration and understanding of the objectives is critical: what is the motivation of my organization to engage with startups and scaleups? It is key to focus on real internal challenges.
- Reflect about resources and returns. What are the resources that the institution is ready to implicate within the process in terms of time, budget, people? What is the expected Return on Investment? What does the institution want to get from the collaboration with a startup and scaleup?
- Consider training of colleagues contributing to the project. Providing them with direction as to how to interact with startups and scaleups, set expectations.
- Make it easier, as much as possible, for startups and scaleups to work with the institution. It is fundamental to be clear on the process and timing from the very beginning.
- Whenever possible, simplify and standardize contracts.
- Be crystal clear from the beginning about Intellectual Property ownership and encourage consulting legal advice.
- Embrace failure. Often, attitude towards failure is still extremely careful and when fear is present among employees, it blocks creative energy and out-of-the-box thinking. If failure is tolerated at a certain extent within the organization, employees learn how to deal with missteps and move forward.
- In order to be able to successfully expand the pool of startups and scaleups, it is also crucial to develop key performance indicators. Gather and analyse data and feedback on a regular basis to measure and monitor the progress of the collaboration. Test, measure, learn and iterate is the right flow.
- Challenges of the institution evolve, while some of the defined challenges will be solved, new challenges will arise.

NEXT STEPS

As mentioned above, the shortlisted 87 customs security relevant startup and scaleup companies are currently being entered in the PIO-section of the POP-platform. We invite the three PEN-CP Expert Teams, the 3 PETs, to check them out, while exploring and assessing potential partners particularly for future prototype grant and open innovation (challenge competitions, hackathons and crowdsourcing ideas) calls and activities, across the three technical themes of the PEN-CP network (big data & risk, detection technologies and laboratory equipment) – and, hopefully some interesting matches will be identified!
This questionnaire aims to survey the PEN-CP related training needs and training possibilities in the partner countries.

Before filling out the questionnaire please contact your training department, subject matter experts, professional departments and please fill the questionnaire with your common opinion.

If you have any question, please contact:
Ms. Susana Wong Chan (susana.wongchan@unil.ch)
Dr. Dézsi Zsolt (dezsi.zsolt@nav.gov.hu)

The questionnaire is located on the PEN-CP Online Platform. You must have a POP account to fill in the questionnaire. If you do not have an account contact Ms. Susana Wong Chan.

**QUESTION 2:** Please list other training topics that your administration deem significant at national level in the context of risk management & big data, detection technologies, laboratory equipment, security performance measurement, customs-customs and other-government-agency cooperation and customs-business partnership programs.

**QUESTION 3:** From the above list, please indicate which topics your administration have training materials available in English and which could be shared with the PEN-CP partners.

**QUESTION 4:** From the above list, please indicate which topics your administration could cooperate with PEN-CP by providing subject matter experts and/or trainers. Select all the applicable.

**QUESTION 5:** Indicate if your training materials are available in internet and/or intranet Learning Management System (LMS).
**PLANNING visits across the 13 PEN-CP Customs Administrations**

As discussed during the Year 1 Annual Event in Budapest, PEN-CP partners UNIL and CBRA propose a plan to visit the Customs partners, to collect Customs challenges, to provide training on the POP-platform, and more. Please contact Ms. Susana Wong Chan to agree on the visit schedule and details: susana.wongchan@unil.ch

**WHO?**
Ms. Susana Wong Chan (UNIL) and Ms. Gillian Castle (CBRA) plan to visit you.

**WHEN?**
You can choose the visit dates between March and October 2020.

**LENIGHT?**
1.5 to 2.5 days, depending on the agreed agenda.

---

**THE ACTIVITIES**

Please find on this page suggestions for “Recommended activities” and “Additional activities” during the visits.

You are welcome to choose a combination of visit activities which best suite the priorities of your administration!

---

**Recommended activities**

- **COLLECTION OF CUSTOMS CHALLENGES, NEEDS AND IDEAS** from customs officers, working in one or more of the PEN-CP technical topics (Data and risk, Detection technologies, Laboratory equipment).
  Estimated time: 3–4 hours (per technical topic)

- **COLLECTION OF USER EXPERIENCES** on products and services that your administration is currently using.
  Estimated time: 2–3 hours

- **PEN-CP ONLINE PLATFORM TRAINING** for customs officers working in one or more of the PEN-CP technical topics.
  Estimated time: 1–2 hours

- **MEETING WITH THE DEPARTMENT IN CHARGE OF THE “SUGGESTION BOX”** (if available).
  Estimated time: 1 hour

---

**Additional activities**

- **PRESENTATION OF THE PROJECT TO YOUR ADMINISTRATION.** We can briefly present the project to those customs officers that are not yet familiar with the project but might have interest to join some activities in the near future.
  Estimated time: 30 minutes (20min presentation and 10min questions)

- **INNOVATOR BREAKFAST.** We can meet with promising start-ups and scale-ups that are located in your country and share information with them about upcoming PEN-CP Open innovation and Prototype grant calls.
  Estimated time: 2–3 hours

- **BRAINSTORMING** on relevant topics for Annual study chapters, Standardization roadmap, Open innovation, etc.
  Estimated time: 1–2 hours
Continuous interactions with other relevant networks, projects, expert groups, commercial parties etc. is crucial for the full success of PEN-CP. The goal is that each PEN-CP partner, particularly the 13 Customs partners, would have minimum one role in representing PEN-CP in discussions and events with other parties, during the remaining 3.5 years of the project.

During the past 6 months, the second version of PEN-CP Points of Contacts (PEN-POCs) table has evolved in an organic style, and by now we have seven (EST, NOR, BEL, HUN, IRL, GBR, NLD) of the 13 Customs with minimum one such role agreed. It would be great if by June 2020 we had each of the remaining Customs partners included in this table – considering of course that additional external entities, attractive for cooperation with PEN-CP, will be jointly identified soon.

The practical role of the PEN-POCs is straightforward, not requiring many working hours per year. For example, with the H2020 procurement network iProcureNet, we have preliminary plans for two phone meetings per year, as well as joining each other’s physical meetings at least twice during the coming four years. At the other end of the spectrum, we are in preliminary discussions with 1-2 expert groups on cooperating in the context of technology grants and open innovation instruments, which all would require more work from the PEN-POC.

### PEN-CP Points-of-Contacts (PEN-POCs)

Solution providers to match Customs user needs and challenges

Plus, the Project Coordinator is the PEN-POC towards C2020 TAXUD Office as well as towards WCO Management.
Europe is still struggling to ensure the market uptake of many innovative security solutions – despite the production of high-quality novel technologies and knowledge all over the continent. This gap is further widened by the specific character of the security market: fast-changing, driven almost entirely through national, and sometimes regional and local, legislation and standards, and often subject to constrained budgets.

This is where procurers come in: They are at the steering wheel – shaping the security market and enabling it to respond to ever new challenges.

**Joining forces among European security procurers**

iProcureNet, launched in May 2019, is a Horizon 2020 funded practitioners’ network based on this principle. Fifteen partners from eleven European countries, among them ten public procurement institutions, have joined forces in the project.

During the next four and half years, iProcureNet will establish a network of European security procurement experts. Based on their joint expertise, iProcureNet will compare national investment strategies, analyse security markets, identify innovation needs, and map the European procurement environment. In the end, the project will have significantly contributed to the market uptake of innovative solutions and to the joint procurement of security solutions across national borders.

**What is in it for PEN-CP?**

Procurement is crucial for any stakeholder involved in important security questions. PEN-CP customs experts are therefore invited to contact iProcureNet (contact@iprocurenet.eu) in order to join our Online Community. There, you may for example get involved in the “Border Control and External Security” discussion group to assess and discuss the procurement of equipment and services in this field.

For anyone already familiar with the basics of public security procurement, the first iProcureNet Advanced Security Procurement Conference, might be of interest. We are very happy to welcome Hans Wilhelmsen (Norwegian Customs) from PEN-CP there to discuss the role of procurement in a panel, together with other security practitioner networks.
**H2020-ARESIBO: ENHANCING BORDER SECURITY WITH AUGMENTED REALITY AND ARTIFICIAL INTELLIGENCE**

A recently launched H2020-project ARESIBO develops augmented reality and artificial intelligence technologies to strengthen border security. As a project partner, Cross-Border Research Association manages customs liaison in ARESIBO, contributes to collection of end-user requirements, and participates in operational pilots.

**What will ARESIBO achieve?**
ARESIBO seeks to improve situational awareness at the EU’s external land and maritime borders. ARESIBO solutions build on Augmented Reality (AR) and Artificial Intelligence (AI) technologies, which have a great potential for transforming tactical decision-making of border guard services. The project will also explore how border security could be supported by unmanned ground, aerial, underwater, and surface vehicles.

The key end-users of ARESIBO innovations are border guards that can use new technologies to keep border patrols and command & control operators updated on changes in the border security environment. ARESIBO solutions can be used for many purposes: border surveillance, land and coastal patrolling, threat analysis, search and rescue operations, and coordination of multi-agency operations. The solutions will help to mitigate migrant smuggling, human trafficking, and drug trafficking, among other possible risks.

**Why is this project needed?**
Border security has become a, increasingly important political priority in EU over the past years. Border security operations have also become more demanding with the changing threat landscape and ambitious operational goals of border guards. Fortunately, border guards can access more situational information today than some years ago. The challenge today, however, is that border guards do not always know how this information could be optimally used for situational awareness and risk assessment purposes. Augmented Reality and Artificial Intelligence technologies can help overcome this challenge.

**What is the link between PEN-CP and ARESIBO?**
Cross-border Research Association is responsible for customs engagement in ARESIBO. The customs community is a rich source of border security expertise that can help ARESIBO partners to develop new border control solutions. PEN-CP, and the PICARD program of the World Customs Organization (WCO) are natural partners for customs liaison.

**How can PEN-CP partners contribute to ARESIBO and ultimately benefit from the project’s outcomes?**
ARESIBO kindly asks PEN-CP partners’ support in validating end-user requirements. In particular, ARESIBO is interested in learning how could unmanned vehicles support customs operations and if customs datasets can help border guard operations, or vice versa. Customs’ inputs are also asked for the elaboration of the concept of operation (CONOPS) and the demonstration scenarios. Support would also be welcomed in the identification of best practices for the design of the Risk Analysis framework for border surveillance. Finally, we would like to explore how customs and border guards could strengthen their cooperation at the external EU borders.

As the next step, Vittoria Luda di Cortemiglia (vittoria@cross-border.org), the CBRA expert working in ARESIBO project, will prepare and send out a short questionnaire to all PEN-CP Customs partners, by mid-March 2020.
